2020: Twentyfive Years of EIIW Research

Dr. Fabian Baier, Dr. Arthur Korus, Tian Xiong, Prof. Dr. Paul J.J. Welfens, Samir Kadić
in a Deutsche Bundesbank sponsored research project on Brexit-related Capital Market Perspectives

INTERNATIONAL PERSPECTIVES AND CHALLENGES

Europe faces a series of challenges: The globalization of economic relations and international locational competition as well as macro-economic policy efficiency in light of the rising influence of multinational companies and banks; moreover, there is an expansion of multilateral organizations and international co-operation. The opportunities and problems of the information society, issues of transatlantic co-operation and regional economic integration/disintegration in the EU are also crucial issues in the 21st century.

Technological progress, institutional reforms and the optimization of economic policy offer opportunities to raise the standard of living and to contribute to stability in the digital world economy. Monitoring and analyzing economic dynamics or evaluating policy options in open economies is fascinating. Learning from (optimization) models or best-practice is important for a common sustainable future around the globe.

The EIIW, a politically independent non-profit organization, is the first economic research institute in Germany which analyzes international economic problems from a truly European perspective. This is a formidable intellectual challenge since one not only has to focus on policy issues from a national perspective but also to consider the overall EU picture and the various perceptions and interests in the Community.

The internationalization of economic relations and hence policy relations is intensifying and has increasingly attracted the attention of political decision-makers, investors, consumers/workers and NGOs. The internationalization trend as well as the emergence of new global communication networks offer both opportunities and risks to individuals, regions and whole economic systems. Creating a stable global market economy is a major challenge for the 21st century. This is the background to the research and activities undertaken by the EIIW, its researchers and the large international network of economists, many of whom have participated in more than 40 international workshops and conferences held since 1995 - the year EIIW was founded, and the following 19 years.

ANALYTICAL FOCUS AND WEBSITE

A major research focus is on the requirements for a stable and efficient international division of labor and technologies, including the integration of Eastern Europe. We are also strongly interested in issues of trade, migration and capital flows on the one hand and regional integration efforts in other parts of the world on the other. Real-world business issues as well as of those economic policy are analyzed. An important characteristic of the EIIW is its orientation towards topics of practical relevance and an often comparative research focus.

The Institute's main fields of analytical research are:

- Globalization, multinational companies and trade
- European integration and transatlantic economic relations
- Telecommunications, the information society and ICT
- International developments in labor markets, social security & health care systems/Corona Research
- EU-China-India-Asean and EU-Africa
- Comparative analysis of the dynamics of innovation and entrepreneurship
- Macroeconomics, banking/capital market dynamics
- Sustainability economics, the analysis of energy markets and infrastructure networks
- Policy reforms in market economies and North-South dialogue; New Social Market Economy
- Economic policy optimization, including the development of European-specific policy proposals

Apart from self-financed projects, the EIIW also undertakes research and consultancy activities for other organizations (for example the European Commission and the European Parliament), for governments of EU member countries as well as for various companies. The EIIW aims to provide a forum for innovative and critical research and at the same time provide an intellectual bridge between the research community, the business sector and economic policymakers. Independent economic research is crucial for all decision-makers. Information can be downloaded on many topics and issues from our award-winning website, www.eiwiw.eu.

NEWSLETTER 2019 ON THE EIIW WEBSITE

THE PRESIDENT

Prof. Dr. Paul J. J. Welfens is the President of the EIIW. He holds the Chair of Macroeconomics at the University of Wuppertal as well as the Jean Monnet Chair for European Economic Integration. Welfens has testified before both the US Senate, the EU Parliament, the German Parliament the BNetzA, the ECB and the UN; Welfens has also been a consultant to the IMF and has been invited to give seminars at the IMF, the World Bank, the ECB, the ITU, the Interaction Council, the FCC, Georgetown University, Princeton University and other universities.

He also is Managing Editor of the Journal **International Economics and Economic Policy** with Holger Wolf from Georgetown University, Washington D.C. and Ansgar Belke, Universität Duisburg-Essen plus Christian Richter, Kairos ([see https://link.springer.com/journal/10368](https://link.springer.com/journal/10368)). Raised in Germany, Switzerland and France, he has a truly European background. He was awarded his doctorate (and his "habilitation") in Economics from the Mercator University of Duisburg and has previously held positions at AICGS/the Johns Hopkins University, the University of Muenster and the University of Potsdam. Welfens also has worked on the board of the International Joseph A. Schumpeter Society and the Osteuropa Institut/ University of Regensburg.
